July 1, 1957—December 23, 1957

March 1, 1958—September 30, 1958

Charles J. Saporito, M.D.

October 1, 1957—September 30, 1958

William R. Lockwood, M.D.

Harold P. McDonald, M.D.

January 1, 1958—December 31, 1958

Joseph T. Hamrick, M.D.

July 1, 1958—October 31, 1958

Alfred R. Hale, M.D.

July 1, 1958—July 31, 1959

Howard B. Cheek, M.D.

January 1, 1959—December 31, 1959

Miles C. Gregory, M.D.

June 1, 1959—May 31, 1960

Charles J. Abdo, Jr., M.D.

Interns listed below from the United States Public Health Service Hospital, New Orleans, Louisiana, served in Charity Hospital on the Tulane Pediatrics Service for periods listed:

July and August 1958

Paul G. Pechous, M.D.

Milton Reisner, M.D.

January and February 1959

John R. Baugh, M.D.

Sallie Bosch, M.D.

CHARITY HOSPITAL INTERN STAFF—(Continued)

September and October 1958

Bobby E. Jennings, M.D.
Raymond H. Owings, M.D.

November and December 1958

Charles D. Burgess, M.D.
Roy F. Dearmore, M.D.

March and April 1959

James C. Graham, M.D.
Charles T. McCarver, M.D.

May and June 1959

Michael Ellsasser, M.D.
James P. Fields, M.D.

ORAL SURGERY INTERNS

July 16, 1957—July 15, 1958

William F. Wharton, D.D.S.

July 1, 1958—June 30, 1959

Daniel O. Conwill, D.D.S.

James D. Hall, D.D.S.

PATHOLOGY—Quota: 14—Dr. Emma Moss, Director of Department

Dalgre, J. E. (LSU)

De Real, Ricardo E. (Tulane)

Harrison, Travis J. (LSU)

Holcomb, R. (Tulane)

McConnell, Charles (Tulane)

Stambulie, R. (Tulane)

Victor J. Matukas, D.D.S.

Carlos F. Valls, D.D.S.

Milam, John (LSU)

Risinger, George (LSU)

Royal, David S. (Tulane)

Simpson, Marion G. (LSU)

Smith, John L. (Tulane)

BLOOD BANK—Quota: 5—Dr. John Adriani, Director of Department

Cochran, Doyle (LSU)

Delahaye, E. (LSU)

Latour, T. (LSU)

Murtagh, James (LSU)

Sinclair, Dan (LSU)

DOCTORS AND PATIENTS LIBRARY—Quota: 4—Mrs. Lily Twining, Librarian-in-Charge.

Bordeaux, F. (LSU)

Budd, James (LSU)

Schulinkamp, Robert (LSU)

Story, Jacob (LSU)

ALCOHOLIC REHABILITATION UNIT—Quota: 1—Under Department of

Medicine, LSU

McAlpine, L. (LSU)

RECORD ROOM—Quota: 4—Mrs. Eddie Cooksey, Record Librarian-in-Charge

Ferrans, Victor J. (Tulane)

Harmon, William (LSU)

Karst, Charles E. (Tulane)

Moncrief, James (LSU)

PSYCHIATRY—Quota: 2—Under supervision of Dr. Wm. Super

Carter, Camellia (LSU)

Gonzalez, Victor (Tulane)

PREMATURE INFANT NURSERY—Quota: 1—Under Dr. Wm. Newsom

Cronan, Brooks (LSU)

DENTAL EXTERNS

The entire Senior Class in Dentistry of Loyola University Dental School rotate as Externs in Dentistry—their names and period of assignments are as follows:

December 14, 1958—January 3, 1959

Archie R. Evans

Louis D. Britsch

JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

June 30, 1959

The Honorable Earl K. Long
Governor of the State of Louisiana
Baton Rouge, Louisiana

Dear Governor Long:

The Vice-President of the Board of Administrators and the Director of Charity Hospital of Louisiana at New Orleans, submit the following report of the activities of the hospital for the fiscal year July 1, 1958 to June 30, 1959.

The detailed information set forth in this report by departments will reflect the operation of the hospital in its entirety. It is with considerable satisfaction that we report further, that the traditional high quality of medical care which this hospital has always afforded its patients was continued throughout the past year.

Cost of Operation—Cost of operation as compared with the previous year increased \$81,087.65 from \$12,291,812.35 to \$12,372,900.00. Salaries increased \$151,174.86 while drugs and surgical supplies and food decreased, thereby offsetting part of the increase in personnel cost.

Capital Improvements—In the Main hospital building improvements were made in the amount of \$90,454.28. Of this amount repairs to the roof amounted to \$8,290.00; \$72,477.28 was used to cover an over-expenditure in improvements to the Seventh and eighth floors (Radiology department), to the Louisiana Building authority. The Seventh floor was refloored at a cost of \$9,687.00. In the Power house a Deaerating Hot water heater was being installed, the cost this fiscal year being \$36,432.79.

Major items of equipment purchased out of the current year's legislative appropriation during the fiscal year were as follows:

Automotive—

1—1959 Ford custom 300—six passenger Sedan— 6 cylinder engine	\$ 1,762.92
1—1959 Chrysler Windsor 4 door sedan, fully equipped.....	2,375.65
1—1959 V-8 Ford Country sedan Amble wagon.....	3,450.00
1—1959 Ford Country Sedan Amble wagon 4 door 9 passenger, V-8 Engine	3,359.57
	<hr/>
	\$10,947.54

Building and General Plant—Laundry

4—Sets American Matrix Extractors, 4 Containers for Extractors	\$59,991.60
1—Gardner Denver Model RV-1049 Air compressor complete.....	4,304.00
1—Cleveland Tram Rail #3025 a Hand propelled—3000# Capacity	2,978.00
	<hr/>
	\$64,273.60

Household Furniture and Fixtures—

3—Automatic model A.M. Dishwasher stainless steel.....	\$ 4,990.00
8—Floor king polishers and scrubbers.....	3,153.39

Laboratory, Hospital and Medical—

17—Gomco stand mounted suction unit operating pumps.....	\$ 5,910.00
1—Model PR 7 Research Recording unit.....	5,950.00
1—Nuclear Chicago model 181 A Royal Decade scaler & Model T dual timer with analytical count ratemeter complete	6,446.94
170—Halsey Cassettes with Pottuson Hi-speed screens.....	6,383.29
X-Ray equipment including mobile x-Ray units.....	51,642.34
2—Auto-Analyzers	9,354.24
	\$85,686.81

Office Furniture and Fixtures—

21—Filing cabinets	\$ 2,264.41
18—Manual typewriters	2,499.75
4—Electric typewriters	2,365.00
1—Executone Equipment	1,173.82
1—Lot of Gray Steel shelving for Record Library.....	6,975.20
1—Multigraph Collator—Model 650	5,991.84
1—Vari-typer Model 160	3,489.22
1—Multigraph #1250	3,469.76
	\$28,329.00

Contracts were entered into for the construction of the housing for the VandeGraaff machine. New Laundry extractors were purchased in the amount of \$51,587.00.

During the fiscal year, the Dental clinic was expanded and approximately \$20,000.00 worth of dental equipment purchased.

Plans and specifications were secured for the construction of the 12th floor Special x-Ray facilities.

Renovation and modernization on the 10th floor Delivery room area and the Child Development project on the 10th floor.

Reflooring of the 5th floor and the 6th floor Infirmary area was completed at a cost of \$14,751.00.

The exterior of the Dibert building was painted at a cost of \$9,945.00 out of the Dibert Endowment fund.

Personnel Department—During the year most of the departments were put on a 40 hour work week. Plans are being formulated to place the balance of the departments on the same number of hours per week, in the very near future.

A fingerprinting program was instituted and all personnel with fraudulent application forms in which arrests were denied have been released.

A Cyclical audit of all positions were made which resulted in approximately 200 classification changes.

Purchasing Department—All purchases of supplies, material, equipment and Contractual services for the hospital were made in accordance with provisions of the State laws governing the procurement of supplies. The services of various testing laboratories were utilized to assure compliance with specifications.

Patients Services—During the fiscal year, 67,408 patients were admitted to the hospital as compared with 71,417 the previous year, a decrease of 4,009. The daily average number of patients in the hospital equaled 2,075. Of the total admissions, 44,025 or 65.31% were from the metropolitan area

(Orleans, Jefferson and St. Bernard parishes) and 22,301 were from the other parishes of the State. One thousand and eighty two (1,082) admissions were from other States and foreign countries and were admitted as emergency patients.

Outpatient Visits—627,341 patients were given medical treatment in the clinics and emergency rooms during the fiscal year as compared with 707,922 the previous year, a decrease of 80,581. The hospital's Screening unit has been functioning for almost a year and all patients were interviewed, thereby eliminating the ineligible patients. Patients who were above the established pay scale were admitted only on an emergency basis, and as soon as possible were transferred to private institutions.

During the fiscal year, the hospital collected \$356,798.77 for services rendered ineligible patients. This amount was transferred to the State Treasurer.

The Vice-President and the Director of the hospital wish to acknowledge the very valuable services of the members of the Board of Administrators of the Hospital.

The committees appointed by the Vice-President have functioned efficiently throughout the year.

These committee members have zealously attended meetings and through their conscientious work have given the benefit of their counsel and advice to the Administrators of this institution.

Appreciation is expressed to the members of the Visiting staff, the Resident Physicians, and Interns, who, through their constant devotion to duty and their willingness to answer calls made upon them, have afforded the Indigent of our state the medical attention they so righteously deserve.

The Department heads and all personnel are to be complimented for their services which were rendered so efficiently during the past year.

Respectfully submitted,

Leo. J. Kerne, M.D.

Director

Don L. Peterson, D.D.S.

Vice-President

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

Capital Expenditures—Equipment

July 1, 1958—June 30, 1959

AUTOMOTIVE

1	Model 700 Gallon hydraulic hoist #178052 Mounted on KB5 International Truck, #13, 141398	\$ 518.00	
1	1959 Ford Custom 300 Six passenger Sedan 6 cylinder engine	1,762.92	
1	1959 Chrysler Windsor Four-door Sedan, fully equipped	2,375.05	
1	1959 New V-8 Ford Country Sedan Amble Wagon	3,450.00	
1	1959 Model Ford Country Sedan Amble Wa- gon, four-door-9 passenger, V-8 Engine, complete with Standard Factory equip- ment	3,359.57	\$ 11,465.54

BUILDING AND GENERAL PLANT

1	Cleveland Tramrall #3025A, Hand propelled carries 3000# capacity	\$ 2,978.00	
2	Spinway Model 31 Rotary mowers, heavy-duty propelled Brigg & Stratton 9 H. P. Starter.	972.25	
1	Platform scale model #11500-120 pound capa- city platform 12415	105.20	
2	Noiseless platform trucks, Nutting #484.....	160.76	
1	Gardner Denver Model RV-1049 Air Compressor complete	4,304.00	
1	Quincey Model HL 106 Air Compressor.....	353.00	
1	Condensate return system 20 gallon receiver complete pacifer, model GR 12J 1-110/220/ 60c Motor	249.90	
4	Sets American Matrix Extractors, 4 containers for extractors	56,991.00	66,114.11

HOUSEHOLD FURNITURE AND FIXTURES

5	Westinghouse 5 gallon capacity water coolers..\$	639.77	
1	Westinghouse Electric water cooler, Model WI3c, approx. 13 G. P. H.....	157.75	
1	One H. P. 2034 Wet and dry vacuum cleaner, Giant conversion 55 Gallon Drum.....	280.00	
1	Automatic model A. M. dishwasher stainless steel fully automatic wash and rinse steam & water mixing valve to 180 degrees.....	1,660.00	
4	19" floor king scrubber palls, 2 stainless steel tanks, & 4 adm. floor king polishers and scrubbers	2,000.53	
1	Scullery sink-2 compartments of 16 Gal. type 302 Stainless Steel, complete.....	368.75	
4	Admiration 19 inch American floor king pol- ishers and scrubbers	1,152.86	
35	16 inch Emerson fans	1,812.51	
6	12 inch Emerson fans	381.00	
1	30 inch Emerson fan	91.07	
4	Janitor's carryalls of welded construction....	223.20	
2	Hobart model AMA+2 dishwashers for straight through operation	3,330.00	
1	Industrial wet-dry vacuum cleaner, Pullman vacuum mobile model.....	205.50	

1	Singer Sewing machine	\$ 149.69	
1	Singer Sewing machine, Model 401-431.....	243.32	
1	Electric water cooler, bubble & compartment type	189.00	
1	Hobart Mixer, #A-200	475.81	
1	Garland Range, #284-21 for natural gas	366.12	
1	G. E. Disposal, #FA-601 Serial T. R. 300971....	72.42	
2	Dishwashers, SV-80RN8, Serial #VP 500985, & TP-502547 with base cabinets	672.18	\$14,471.48

LABORATORY HOSPITAL & MEDICAL EQUIPMENT

1	Prodel Portable Incubator	\$ 150.00	
1	Bausch & Lomb medical monocular microscope #56670, model CBR8	366.00	
1	Stainless steel autopsy table.....	1,130.00	
1	Isolette Infant incubator, two (2) door cabinet model E-35	660.00	
1	Set fluorescopic & time meter X-ray equipment	561.00	
2	(2) Gomco ENT Suction machine #930, + (2) Gomco Theromatic pumps model #765....	1,170.00	
1	Hand spectroscope with direct vision prism complete with stand	235.00	
3	Gomco ENT Suction machines, #930.....	1,305.00	
1	Stainless steel Barium mixer, thermostatically controlled	395.00	
1	Gomco Theromatic pump, #765	150.00	
2	#120 C Vantatin, complete	800.70	
1	Gomco Theromatic pump	150.00	
5	Recovery room stretchers	2,693.25	
3	Bunn Glove powdering machines.....	885.00	
3	Emerson Pleural suction machines.....	675.00	
1	Model PR7 Research Recording unit.....	5,950.00	
1	Ultra sonic instrument cleaner, std. model with additional transducized tank	1,020.00	
1	SM131 Geiger survey meter	109.50	
3	Incubators, installed	775.00	
1	Replacement tank, 28 inch diameter, 48 inches high, all hot dipped galvanized construction	279.00	
1	Basic Prado 500 with condensor system com- plete with YNNUK, large micro attachment for 341 slides	305.00	
1	International size 2 model V Centrifugal with steel guard bowl auto transformer.....	864.60	
1	#3800 head 16 place trunion carrier, 3 place..	136.20	
1	Nuclear Chicago model 181A Royal decade scaler & model T dual timer with analytical count rate meter complete	6,446.94	
1	Bausch & Lomb medical monocular microscope model CBR8	397.00	
2	Westinghouse 200 mobile X-Ray unit.....	6,952.00	
126	Holsey Cassettes with Pottuson hi-speed screens	3,913.90	
2	Gomco thermotic pumps	300.00	
1	Logetronic contact printer model CP18-S with all accessories necessary to reproduce 14 x 17 X-Ray negatives	4,761.00	
1	250 KV Constant Potential deep therapy unit with moving beam iffadeation stand includ- ing additional M. A. meter	16,536.95	
16	10 x 12 Grid cassettes with Dupont Polyster base hi-speed screens	429.86	

6	Chaffin Pratt RS100 Recovery room stretchers complete with mattresses	\$ 3,231.90	
1	71-91-01 Table	80.00	
1	71-21-35-01 Keratometer #PH3810	510.00	
1	Barium Enema solution mixer, stainless steel 13 gallon capacity thermostatically controlled	395.00	
1	High Frequency X-Ray deep therapy unit installed	17,156.00	
1	Model HP-4 Themopress	675.00	
2	Emerson Vasculalder bed	2,000.00	
44	Halsey 14 x 14 cassettes with Dupont Polyester hose, hi-speed screens, 8 Halsey 14 x 17 cassettes with grid fronts & Dupont Polyester hi-speed screens	2,469.39	
1	Heidbunk Anaesthesia machine, less trade-in McKesson Machine #29901	1,540.00	
1	Gomco ENT Suction machine	435.00	
1	Cutie Pie survey meter	306.00	
2	Mobile stands for clinical scales	1,356.00	
1	Focusing eye piece 12.5 with reticule.....	58.14	
1	Camera-Argus C-3, complete with light meter, flash unit and case	63.70	
2	vaporizers, fluotic for foregger table top Rotometer gas machine	504.50	
2	Foregger table tops, Texas model complete with copper kettle rotometer gas machines	2,424.31	
2	Auto-analyzers, complete with accessories	9,354.24	
1	Pleural suction machine, model 28	232.00	
1	Golden grid Focus 72 inch 110 line 10:1 ratio, 14 x 17	203.49	
12	Balkin Frame Portables, complete with fracture bars	1,292.40	
1	Anatrol scanner and intergrator, automatic 115/60 cycle	1,630.00	
4	Derrum type cell units, capacity 8 strips complete with 5 dye racks	951.45	
1	Preceptscope, Mark II-16 mm projector, #E-5082A	1,283.93	
1	Camera, Alpa 8 Serial #38731735453, complete with deluxe case, less filters, glass condensers, cable release	1,438.00	
1	Chicago gas machine, model 575, equipped with draw-over vaporizer, ethelyn, nitrous oxygen, less trade-in McKesson machine..	922.50	
1	Heidbunk model 1436 gas anaesthesia machine for Nitrious-oxide, complete with plastic canister with built-in blood pressure monometer	1,319.73	
7	Gomco #901 stand mounted suction unit operating pumps	2,400.00	
1	Cambridge explosion-proof operating room cardiscope	1,985.00	
1	X-Ray film processing water cooler, 66 gallons per hour	230.00	
1	Tablet machine model E, single punch equipped with fine calibrated file	1,270.00	
1	Diagnostic X-Ray generating unit & Hugh Young Pickett Liebel Floresheim table	3,767.00	\$121,987.85
OFFICE FURNITURE			
1	Ledger tray truck, safe underwriters Laboratories key lock	\$ 251.60	

7	(4) drawer file cabinets	\$ 482.64	
23	Upholstered secretarial chairs	889.70	
4	full suspension 4 drawer lock type Green file cabinets	187.60	
1	Model FP 16 inch carriage typewriter, Royal #16-6376899	225.00	
4	18-drawer mailing list cabinets, Olive green without locks	233.00	
1	Walnut typewriter desk 60 x 33½ triple drawer right pedestal	120.00	
1	12 inch IBM Electric typewriter, serial #11- 742765 elite type	420.00	
3	Single channel speakers, intercommunication units	89.10	
1	Casco Palamin Gray Finish chair	93.20	
1	Casco Posture Gray Finish chair	33.00	
1	Odhner Adding Machine with multiplication ..	346.50	
2	Tabulating card files, 10 drawer spade gray metal	251.50	
1	Executone Equipment	1,173.82	
1	13 inch IBM Executive Electric typewriter..	625.00	
1	Rack type open steel shelving, single posts 1 x 1 3/4-87 inches high with holes 1 inch apart for mounting 6 faced shelves.....	165.00	
1	Power Control time master dictating machine.	350.00	
2	Odhner adding machines, #XX11C7-298989....	618.00	
1	Lot Gray steel divider type shelving	6,975.20	
1	Used copier, letter size	150.00	
1	Steel case executive desk with 1 executive chair and 4 side chairs	470.00	
1	4-drawer Shaw Walker file with lock.....	91.88	
2	Time Master Control dictating machines	700.00	
2	IBM Electric typewriters with elite type, 20 inch carriage statistical keyboard, #36 Green model with decimal tabulation.....	1,320.00	
2	Standard Kardex cabinets	506.50	
3	Facit Automatic calculators	1,417.50	
1	4-drawer letter size file cabinet.....	91.73	
8	Standard Royal typewriters, less trade-in on 8 typewriters	1,087.25	
1	Underwood touchmaster typewriter, less trade- in 1 typewriter.....	307.50	
2	Kardex cabinets	264.00	
1	Multigraph 1250 #707660 complete with motor	3,659.76	
1	Vari-typer model 160, serial 13150	3,489.22	
1	Multigraph collator model 650 #50-59-398....	5,991.84	
8	Standard Underwood typerwriters, less trade- in, 8 typewriters	880.00	
1	Jasper desk chair, walnut finish	64.20	
1	Telephone table	61.00	\$ 34,082.24

EDUCATIONAL AND RECREATIONAL

1	Bell & Howell film sound model 185 with 12 inch speaker (Used)	\$ 200.00	
1	Cavalcade automatic projector	113.50	
1	Movie projector 16 MM kodakscope analyst with carrying case	300.00	
1	Supermatic printer for 35 MM films	77.50	
1	Kodak Pagent sound projector 16 MM model AV085 with carrying case	139.00	
1	Radiant screenmaster screen with Uni-glass surface 70 x 70 tripod mounted	47.32	
1	Human skeleton complete with cabinet	296.00	1,173.22

REFRIGERATION AND AIR-CONDITIONING

1	Model 8W100-2-S 1 ton air conditioning unit..	\$	279.95	
2	R 472-R-26 Air conditioners 1 ton, 220 volt with thermostat		330.00

CHARITY HOSPITAL OF LOUISIANA
AT NEW ORLEANS
ANNUAL REPORT
PURCHASING DEPARTMENT
July 1, 1958—June 30, 1959

This is the report of the Purchasing Department for the year ending June 30, 1959.

There were 20,314 purchase orders, purchase order changes and purchase order cancellations written during the twelve month period. This represents a 10.6% increase over the previous year.

All contracts and orders were awarded to the lowest responsible bidders on a competitive basis. The services of various testing laboratories were utilized to assure compliance with certain specifications.

Six annual contracts for goods amounted to approximately \$371,000.00 and four annual contracts for services amounted to \$18,056.00. In addition there were twenty eight bids held and orders written for commodities purchased on a monthly and quarterly basis. Thirty nine bids were also held for non-routine goods and services such as x-ray equipment, air-conditioning, tile flooring, dental equipment, pharmacy solution room equipment and the like.

Surplus commodities received from the Food Distribution Section of the State Department of Education were as follows:

Hardwheat flour, 50 lb. bags.....	24,700 lbs.
Butter 65 lb. av. case.....	4,875 lbs.
Butter, 32/1 lb. prints per case.....	32,000 lbs.
Rice, 100 lb. sacks.....	40,000 lbs.
Cornmeal, 50 lb. bags.....	7,500 lbs.
Cabbage, fresh, 50 lb. sacks.....	5,000 lbs.
Dried milk, 250 lb. av. drum.....	3,750 lbs.
All purpose flour, 50 lb. bags.....	9,850 lbs.
Cheese, 6/5 lb. av. case.....	1,800 lbs.

The market value of these commodities was \$32,496.00 an increase of \$8,880.21 over the value of those received the previous year. Prices were estimated upon prevailing market prices at the time of receipt of the commodity.

Respectfully submitted,

ANNUAL REPORT**Yearly Report to the Director****PERSONNEL DEPARTMENT****July 1, 1958—June 30, 1959**

Total number of active employees as of June 30, 1959..... 3,402

A new screening unit was put into operation July 1, 1958 and by transferring employees from the Social Service Department and by creating new positions, 39 employees were provided for this work.

A cyclical audit of all positions in the Hospital resulted in approximately 200 position changes. Reorganizations in the Screening Unit, the Accounting Department, the Personnel Department, the Dietary Department, the Housekeeping Department and the Departments of Diagnostic and Therapeutic Radiology accounted for many of these changes. The Hospital was commended in this audit by the Department of State Civil Service for the manner in which it has adhered to the provisions of the Classification and Pay Plan and, in several personnel records checks, no errors were found in our practices.

A fingerprinting program was instituted at the direction of the Board of Administrators and to date 2,822 employees have received clear records from the Federal Bureau of Investigation. Because of serious offenses which prohibited their continued employment by the State, or because of an unsavory past record, 18 employees have been discharged from their positions. An additional 10 employees have resigned since their records were revealed and 94 employees have been informed by Hospital telegram that trivial offenses have been reported and have been made a part of their personnel files. This program has been difficult to manage and, many times, unpleasant to enforce, yet we believe that the results obtained have been most worthwhile.

Charity Hospital and its employees have received several awards this year. At the Founder's Day Dinner held during the Sixth Annual Civil Service Personnel Management Conference in Baton Rouge, the Hospital was awarded a certificate for its outstanding personnel program. Mr. Jean Pujol, Miss Josephine Marino and Mrs. Amenaide Haydel were recipients of an honorable mention for the Charles E. Dunbar Award and were feted at a dinner at the Roosevelt Hotel. Mrs. Marie Manich and Miss Nancy Reppeto received outstanding service ratings from their supervisors.

Salary increases were granted on a meritorious basis to 1,873 employees on February 1, 1959. In addition, the interns in the Hospital were granted an increase in salary retroactive to the first of the year.

An extern program was established and placed under the control of this department. New application forms and appointment forms were devised for use in this program. We hope to be of service to the several departments in which externships have been established. Properly managed, this program should greatly benefit the Hospital.

During the year, most departments of the Hospital were placed on a 40-hour work-week. It is hoped that all departments may be able to adopt this policy in the near future.

This has been a gratifying and a progressive year and in all matters we have enjoyed the complete cooperation of the Board of Administrators,

the Director, the Sisters of Charity, the department heads, the staff and the Department of State Civil Service.

Respectfully submitted,

/s/ CHARLES C. STURTEVANT

ANNUAL REPORT SISTERS' DIVISIONS

July 1, 1958—June 30, 1959

During the past fiscal year, the departments comprising the Sisters' Divisions continued their efforts to maintain standards of performance and to improve the quality and scope of service rendered. Detailed reports of the activities of each department are being submitted by the respective department heads.

The Dietary Department continued its efforts to provide well-balanced, attractive, hot meals to hospital patients and to physicians, student and graduate nurses, and other personnel who are furnished meals in the hospital dining rooms. While the number of graduate dietitians remains low, there has been a steady increase in the number of student dietitians applying for enrollment in the one-year, accredited program of internship offered at Charity Hospital through the Dietary Department. This program is meeting a definite need in the training of dietitians in the South.

In the Housekeeping Department, greater floor cleanliness has been achieved through the purchase and use of nine new floor cleaning and polishing machines. In addition, a piece of equipment known as the Thermo-Patch Press has proved to be a time-saving device which has added much to the efficiency of the Linen and Sewing Rooms. Such modern equipment will enable the employees of the Housekeeping Department to render better service.

The Nursing Service Department is still handicapped by the prevailing shortage of professional nurses, but by maintaining an active in-service training program for practical nurses and nurse aides, the department manages to provide patient care. Although the turnover of employees in the professional nurse staff remains high, the practical nurse and nurse aide staffs are relatively stable. Near the close of the fiscal year, the Nursing Service Department was at last able to achieve one of its long-term goals, the placing of all non-professional personnel in the department on a forty-hour, five-day work week. Renovation of the Infirmaries, Radiology Wards, and the installation of new flooring and new paint in several areas have brightened and improved the appearance of these wards and have provided a cheerful, clean and fresh environment to which the patients have responded.

The School of Nursing has continued to operate as far as possible in accordance with state and national standards for accreditation. The education of the student nurse is the primary obligation of the School of Nursing, but efforts are continually made to supplement the nursing care provided by the Nursing Service Department without sacrificing educational standards. Student nurses are assigned to areas which offer good learning experiences, and the patient care rendered by them in these areas is considerable and important. In the last few months of training senior student nurses are taught to meet the requirements and responsibilities of graduate professional nurses, in order that the transition from student to graduate may be accomplished by a minimum amount of necessary adjustment.

We are pleased with the progress made in renovating the Sisters' Residence. The work to be done on first floor is virtually completed. Modernization and repair of these facilities have resulted in greater efficiency in their utilization, and have added greatly to the comfort and convenience of the Sisters. Renovation of other areas of the Sisters' Residence is continuing.

Throughout the year, the director of the Sisters' Divisions has served as chairman of a hospital committee which was appointed to plan a program of action for the hospital in the event of a community disaster. This committee held frequent meetings, toured various areas of the hospital, consulted heads of major departments, and, in conjunction with the physician who was appointed to plan a program of medical care, prepared a general Disaster Plan for the hospital. This plan has been approved by the administrative staff of the hospital, and is now in the process of being printed for general distribution. All hospital employees will be given orientation and instruction in the course of action to be followed if disaster strikes the hospital or the community. Completion of a satisfactory Disaster Plan will enable Charity Hospital to meet the standards of the various hospital accrediting agencies, and to function effectively in community planning.

The Sisters' Divisions, individually and collectively, wish to express appreciation for the consistent courtesy and understanding which have been manifested by the administrative staff of Charity Hospital when problems have been presented and requests for assistance made throughout the year. Such unflinching consideration inspires us toward greater achievements during the coming year.

Respectfully submitted,

/s/ SISTER MARGARET

Sister Margaret,
Director, Sisters' Divisions

ANNUAL REPORT

NURSING SERVICE DEPARTMENT

July 1, 1958—June 30, 1959

Director of Sisters' Divisions	
Sister Margaret, R.N., B.S., F.A.C.H.A.	
Director of Nursing Service	
Sister Laurence, R.N., B.S.	
Assistant Director of Nursing Service	
Willie B. Mask, R.N., B.S.	
Instructor Supervisors	
Petrona Daigle, R.N.	
Janice Quinn, R.N.	
Professional Nurse Staff	
Supervisory	
Daughters of Charity	13
Lay Supervisors	3
Assistant Supervisors	67
Head Nurses	109
General Duty Nurses	
Full-time	107
Part-time	21
Non-professional Nursing Staff	
Practical Nurses	290
Psychiatric Aides	10
Nurse Aides II and III	634
Nurse Aides I	76
Central Service Workers	129
Custodial Workers	21
Clerical Personnel	91
Miscellaneous Personnel	27

The above figures include personnel giving services to hospitalized and out-patients, and who are under the direction of the Nursing Service Department.

The Nursing Service Department has barely maintained its professional nurse staff since July, 1959. The number of full-time general duty nurses is less with each passing year, and as this group of bedside nurses becomes smaller, the inadequacy of nursing care is more evident. The head nurse and supervisory staffs are fairly stable, but it is difficult to secure and retain the services of nurses who are qualified for these positions. Inevitably, as the professional nurse staff becomes smaller, the non-professional nurse staff increases in number, but numbers is not the answer in providing good nursing care. Even private duty nursing which supplements the nursing services of the hospital failed to adequately meet current nursing needs. Of the 700 calls for private duty placed by the Nursing Service Office, 152 were not filled.

Undaunted by these facts, the Nursing Service administrative and supervisory staffs have been diligent in using every means available to promote leadership, to better prepare nursing service personnel to meet nursing needs, and to more effectively utilize the services of each member of the nursing service staff. An intensive therapy unit was established on a

medical service and it has enabled the nurses to give better care to seriously ill patients and those requiring specialized attention. The establishment of a similar unit on the general surgery floor is under discussion.

Expansion in research and educational programs, the newer techniques used in the diagnosis and treatment of patients, and of necessity, the expeditious and satisfactory adjustment by nurses to job requirements give in-service training a high priority in the functions of the Nursing Service Department. The time and effort spent in the orientation and teaching of employed professional and practical nurses, and a consistent follow-up routine have brought good results, particularly at the head nurse and supervisory levels. Well-planned staff education meetings held monthly have contributed to the growth and development of the nursing staff and increased its effectiveness.

Four groups of nurse aides, 109 in number, were enrolled in the training program for this group of employees. Of this number, 67 satisfactorily completed the course. In addition, a twelve-hour course in selected nursing procedures was taught to a class of 18 X-ray technicians.

The Nursing Service Department was responsible for the student nurse affiliations of Dillard University and the Booker T. Washington High School. Plans for clinical experience, health services and rotation schedules were arranged through the Nursing Service Office, and 30 professional nursing students from the university and 41 practical nursing students from the high school participated in these programs. On May 1, 1959, a class of 10 practical nursing students from the L. E. Rabouin Vocational School began its affiliation for clinical experience.

The Premature Infant Center nursing staff again offered a program of orientation and observation in the care of premature infants. The three-week course was attended by 10 professional nurses, and a two-day intensive orientation to premature infant nursing was arranged for the clinical instructor in obstetrics of the Louisiana State University School of Nursing. Hour-long orientations were given to 15 public health nurses, 16 practical nursing students, 187 professional nursing students, 10 students from the Tulane University School of Social Work, and 30 volunteer workers. Assigned to the Nursery for two-week periods of clinical experience in Premature Infant Nursing were 69 professional nursing students from the Charity Hospital School of Nursing, 23 from Dillard University, and 5 from Louisiana State University.

The Nursing Service Office staff actively engaged in orientation programs for residents and interns, dietary interns, student x-ray technicians, practical nursing students, and volunteer workers. As members of the hospital Disaster Committee, the Committee on Infections and the Records Committee, they rendered worthy assistance which facilitated the work of these groups. Direction and support was given to the nursing supervisors and recommendations made to the hospital administrators in planning for a central glove room, the remodeling of the Delivery Unit of the Obstetrical Department, and organizing facilities and nursing services for research projects.

A lively interest in community health education and services was maintained through representation in the New Orleans Hospital Council, the American Red Cross Enrollment Committee, the Louisiana Heart Association, the Volunteer Advisory Committee of the Hospital Volunteer Service, and a personal appearance on a televised program which described the relationship of Charity Hospital to the community. Attendance at institutes on nursing service administration, nursing school curricula, and improvement of the practice of nursing kept the nursing service staff informed of the modern trends in nursing.

The Personnel Health Clinic reported 4,625 patient visits for the year. Immunization programs for typhoid fever, poliomyelitis, tetanus, diphtheria, and influenza were conducted with a total of 2,938 injections given.

The activities of the Nursing Service Committees for the revision of nursing procedures and policies included the construction of two new nursing procedures and the revision of the table of diagnostic tests, some 40 pages of pathology, x-ray and other departmental diagnostic procedures. The reorganization of the Departments of Diagnostic and Therapeutic Radiology necessitated the revision of 13 policies. Other nursing policies changed to accommodate current demands, numbered 14.

In reporting the activities of the Nursing Service Department for the past year, appreciation should be expressed for the 40-hour work week initiated for non-professional nursing service employees, and for the substantial reduction in the number of "over patients" on the wards. Such action on the part of the administrators will be reflected in improved nursing care.

Respectfully submitted,

/s/ SISTER LAURENCE

Sister Laurence, R.N., Director
Nursing Service Department

ANNUAL REPORT

DIETARY DEPARTMENT

July 1, 1958—June 30, 1959

ACTIVITIES AND ACCOMPLISHMENTS

During the fiscal year twelve dietetic interns were graduated and granted membership in The American Dietetic Association, making a total of 169 that have completed their training at Charity Hospital since the internship was established in 1944.

During the past year, a total of 22,185 patients were seen and instructed on special diets in Nutrition Clinic. Of these, new reduction diets totaled 1,628 and reduction revisits totaled 3,368. The number of diabetics instructed individually was 2,444. Many of these returned for reviews and additional advice on their diets. Besides the individual diabetic instructions, 380 patients, relatives, and attendants attended diabetic class, where supplementary instruction is given weekly. Various other special diet instructions—which included the following diets and variations: Bland, Restricted Sodium, Low Fat, Low Residue, High Protein, Low Cholesterol, Colostomy, Low Calcium, Soft, High Residue, Low Phosphorous, High Caloric, Tube Feeding, Allergy, Acid Ash, Dumping Syndrome, Puree, Milk and Cream—Totalled 722. Various diets revisits totaled 1,739.

Obstetric Clinic referred 11,182 pregnant women for diets.

7,806 were instructed on Normal Diets.

3,901 were instructed on Toxemia Diets (and Toxemia reductions)

285 were instructed on Reduction Diets.

Total broken appointments for revisits and reductions and various other diets were 3,114. Some of these returned at a later date. Eleven dietetic interns rotated through Nutrition Clinic. Each was assigned for a period of 5 weeks, one week of which was spent with a City Public Health Nurse visiting patients and attending Well Baby Clinics. Fifty-eight student Nurses rotated through Nutrition Clinic. Each was assigned for a period of one week.

During the fall term, a Clinic Dietitian spent the morning of each Friday at Tulane Medical School Diabetic Clinic, instructing patients and acting as a dietary consultant to the Medical Staff and Students.

All Dietary Department personnel who were working a 44 or 48 hour week, were put on a 40 hour week effective June 16, 1959. This change has created some hardships, but we are endeavoring to maintain our service to the Hospital to the best of our ability. Split shifts for the pantry employees are resorted to only when necessity demands, in order to adequately service the floors.

Some changes have been made in the food service to the various floors in order to improve the service.

Coffee is now made in the Main Kitchen and delivered to the floors in Aervoids. This method saves time and eliminates the duplication of this function on each floor, as well as resulting in a considerable saving of coffee.

Food service out on the wards was initiated in the juvenile units, but had to be discontinued because of the shortage in Nursing personnel.

New dishwashing machines were installed in the 4th, 5th, and 11th Floor Pantries.

New green and white china dishes were put into use in the Doctors' and Nurses' Infirmary.

The large dining room and the private dining room in the Student Nurses' Residence were painted. New draperies were hung, a holy picture was placed in the dining room and flower boxes and planters were added to make the dining room more attractive.

A steel cart was made to carry small articles, and a pass through refrigerator was installed in June.

Three new affiliations were arranged for the new class of Dietetic Interns starting September 1, 1958, as follows:

A three week affiliation with Morrison's Cafeteria in the L.S.U. Medical School, for Pay Cafeteria Service.

A two week affiliation with the Louisiana State Department of Health, for experience in field work in Public Health Nutrition.

A one week research affiliation with Dr. Grace Goldsmith's Metabolic Clinic, Tulane Medical School.

A new Internship Brochure was written by staff members with the assistance of Sister Theresa, and was printed by the Multigraph Department. This brochure is sent to colleges and prospective interns.

Staff members formed a committee and met for several months in order to revise our Diet Manual. It is hoped to have this manual ready for distribution at an early date.

A new sewing machine was purchased for the Dietary Department Linen Room for the repair of employees' uniforms.

Fresh vegetables are being used more often, as each day a number of pantry employees come down to assist kitchen employees with their initial preparation.

Comparative figures of meals served are as follows:

	1957-1958	1958-1959
Patient Meals	2,194,313	2,031,814
Personnel Meals	113,701	1,128,514
Total Meals	2,308,014	3,160,328

Special Diets Served	455,628	385,176
Infant Formulae Prepared	100,620	104,457

MEAL COSTS:

Food	\$ 951,288.96
Salaries	467,882.63
Other Expenses	86,010.88
Formula Room Food	14,478.32
Total	\$1,519,660.79
Donated Food	\$ 26,546.75

RECOMMENDATIONS

We repeat our recommendations of the past several years that a survey be made of the garbage disposal problem confronting the Dietary Department, with a view towards devising a more efficient up to date method of garbage disposal.

Garbage disposal units should also be installed in each floor pantry.

ANNUAL REPORT

HOUSEKEEPING DEPARTMENT

July 1, 1958—June 30, 1959

The annual report of the Housekeeping Department for the fiscal year beginning July 1, 1958, and ending June 30, 1959, is herewith submitted.

The turnover of personnel, including Linen and Sewing Section was 105. Of this number there were 64 resignations and 41 removals. Nine Custodial Workers were transferred by promotion to other departments.

One seamstress position was abolished from the Sewing Section; and one Custodial Worker II position was established for the X-ray Department, 7th Floor. One position was transferred to this department from Nursing Service for cleaning duties in the Observation Section.

In February 1959, all eligible employees received a step raise in salary, and 58 of the heavy duty cleaning positions were allowed a classification change from Custodial Worker I to Custodial Worker II.

Two hundred forty-two mattresses were renovated: 215 in Main Section and twenty-seven in Personnel Quarters.

Window cleaning services were performed by the National Window Cleaning Company as per contract.

Pest control services were carried on satisfactorily by the Charity Hospital Pest Control Workers.

The following new equipment was supplied: Nine new American Floor King polishing and scrubbing machines; one new Giant Wet-Dry Vacuum pick up, and one Thermo-Patch Press for linen repair.

In the Salvage Division \$1,754.98 worth of salvage material was sold.

The following linen replacements were made:

744	Bed Spreads
6508	Sheets (adult beds)
7451	Roller Sheets
1500	Crib Sheets
600	Bassinet Sheets
6104	Pillow cases
7000	Bath towels
6866	Huck Towels
1978	Kitchen towels
15,392	Wash cloths

ANNUAL REPORT

CHARITY HOSPITAL SCHOOL OF NURSING

July 1, 1958—June 30, 1959

ACCREDITATION

The school of nursing presented the three-year interim report to the National League for Nursing Accrediting Agency in June of this year for continued approval and this report will be reviewed in December, 1959.

The official visit for State accreditation was made on July 24, 1958. During the one day visit, the visitor had a conference with the faculty and visited the clinical facilities in psychiatry and the clinics. The teaching load of some instructors was considered heavy and the salary scale of Instructors III (Masters degree and experienced) was noted as being low in comparison with salaries available to experienced teachers.

EDUCATIONAL PERSONNEL AND FACILITIES

During the current year there have been thirteen resignations of the faculty group which totals 41; seven of these are unfilled. The Instructor II position being increased \$50 as a beginning salary has helped in securing instructors but the turnover of personnel continues to be a problem. All instructors doing actual teaching have their basic degrees and seven have Masters degrees.

The Education Building, newly renovated, has been put into use. Included are 2nd and 3rd floors, which includes four classrooms, nursing arts laboratory, science laboratory, and seven offices. Recently an elevator operator has been employed which has greatly alleviated the traffic problem for students and teachers. Future air-conditioning of this building and acquisition of the first floor which is presently occupied by Multigraph-Mimeograph Department are aspired to in order to facilitate learning practices by adding space and having minimum comfort during the heat of the summer months. Pedestal fans purchased to cool the rooms in this building have proven inadequate.

Equipment added include a RCA Junior Motion Picture Projector 16 mm., with sound, and a projector to show filmstrips and slides. A motion picture film entitled "Student Nurse" has been purchased in line with a recruitment program being planned.

RECRUITMENT AND FINANCIAL AID

Recruitment has been done primarily by mail. Visits were made to three local high schools by faculty and students. Two high schools in Florida were visited by a student whose home is in Florida. Plans for Open House are being made and invitations are being extended to all high schools in Orleans and surrounding parishes. Difficulty in filling the position of the recruiting officer (Typist Clerk III) slowed up the work considerably and is partially responsible for the small class recruited for September, 1958.

Eight hundred and seventy-one inquiries were received, 291 applications were processed, 130 accepted, 92 rejected. Of the 130 accepted, 73 were from Louisiana.

The hospital granted loans of \$110 each to three students. Ten students were granted scholarships by various organizations to total \$2,612.00. Nineteen loans ranging from \$15.00 to \$50.00 were made from the Kellogg Loan Fund to students in the school.

Students worked on a pay basis during their vacation and their days off, working a total of 1,938 days.

STATISTICS

STUDENTS:

Charity Hospital	209
Affiliating	64

Schools affiliated with Charity:

in Louisiana	2
out of State	13

Course completed:

Students graduated	73
Affiliating students	316

Admissions & Withdrawals:

Admissions	82	301
Withdrawals	51	12

PERSONNEL:

Nursing Education Unit

Teaching & Administrative (includes 4 Sisters)	34	and 7 vacant positions
Clerical	10	and 2 vacant positions

Student Nurses Living Quarters

Residence Supervisor	1
Hostesses	6 and 2 vacant positions
Clerks	5
Elevator Operators	6
Switchboard Operators	2
Guard	1

Resignations:

Teaching Personnel	13
Clerical	5

CURRICULUM

Work in the Curriculum has consisted primarily in enriching content and improving teaching. More emphasis is being given to bedside teaching and supervision of clinical experience as well as better patient care. Effort is being made to provide additional experience in the out-patient department as has been recommended by both the State and National Accrediting Agencies.

ACKNOWLEDGEMENTS

We appreciate the interest and courtesy extended to us by the Hospital Administration and the Board of Administrators.

Respectfully submitted,

/s/SISTER PAULINE

Charles M. Nice, Jr., M.D.

Director

Department of Diagnostic Radiology

During the past year the reconstruction and remodeling of the 7th floor Diagnostic Radiology Department was completed. Along with the new machines many new cassettes were put into use. On November 1st, Mr. Cliff Darby became head of the technical staff and head of the Technician School. With improvements of teaching and training of technicians the above named equipment was then used to advantage in obtaining much better roentgenographic studies for the patients of Charity Hospital.

The School of X-ray Technology has been expanded into a two year school. In the past any student technician who spent a year at Charity

Hospital was given a diploma. With the revision of the school policies it was decided that the student would be given periodic examinations and that all students would have to pass these examinations in order to remain in the school. The last graduating class on July 31, 1959, were given five examinations based on the questions which are used by the American Registry for X-ray Technicians. All 15 graduates had an average of 75 or over and two students had an average over 90. This indicated a dramatic improvement in the quality of Charity Hospital graduates in X-ray Technology.

On July 1, 1958, there were two residents in diagnostic radiology. We added another resident on October 1st, then another on January 1, 1959. Five new residents came into the department on July 1, 1959. We have two applicants for January 1, 1960. At present we have an authorization of 14 radiology residents. It is my hope that we will be able to have an authorization of 15 residents so that we can take five each year for the three year training period. We already have six applicants for July 1, 1960.

Education concerning protection has been stressed in training residents and student technicians. The use of high kilovoltage techniques, adequate filters, minimal exposure of patients, as well as many other protective features are emphasized in the department. In this way, we believe that all of those who go out into the field of radiology, both as physicians and technicians, will be interested in protecting the welfare of the general public. The true picture of hazard in diagnostic roentgenology has not been completely evaluated but careful consideration to the problem is indicated and all possible protective measures should be carried out for those in this field.

The training program for residents in radiology has been expanded along with the number of residents. The residents in radiology are now taking more training in X-ray technique so that they have a better understanding of the technical problems involved in office and hospital radiology practice. A more careful follow-up is being obtained on surgical and autopsy cases which are then correlated with the X-ray findings. A weekly seminar and film reading conference is held from 5:30-7:00 P.M. every Tuesday evening from the 1st of September through the month of June to which all the residents training in radiology in the entire surrounding community are invited.

Work is being consistently done on developing a large special teaching file of proved cases which may be used in teaching or for review in conferences. It is planned that this file will be available to anyone in Charity Hospital or in the two medical schools who are interested in showing proved cases to classes or conferences.

The Hospital Board has approved the remodeling of a room on the 12th floor so that new equipment may be installed for doing special procedures such as cerebral angiography, cerebral air studies, arteriography and other special procedures which might require some form of anesthesia. This will be a great improvement in those special procedures and will help considerably in the work-up of very difficult cases.

Respectfully submitted,
/s/ CHARLES M. NICE, JR.

Charles M. Nice, Jr., M.D.
Director
Diagnostic Radiology

ANNUAL REPORT

DEPARTMENT OF PATHOLOGY

July 1, 1958—June 30, 1959

The total number of tests performed in the Diagnostic Laboratories was 1,092,071 an increase of 14,401. While there were slight to moderate decreases in several divisions, Biochemistry increased by 25,861 tests, from 222,545 to 248,406.

There were 65 fewer total necropsies than the previous year; however, our percentage was 75%. The Resident and Intern Corps should be commended for their efforts in securing permission for Post Mortem examinations. This is a reflection of good rapport between the Doctors and the families of the deceased.

It was necessary to replace several pieces of equipment that were worn beyond repair: an International centrifuge, a microtome knife sharpener, a micro-projector, and a refrigerator.

Additional new equipment was acquired throughout the year. With the exception of two walk-in types of incubators for the Tuberculosis division, the other new equipment went to Biochemistry: two Auto-analyzers, 1 Vapo-vent, 1 Analytrol Scanner and integrator and several lesser pieces of apparatus.

There continues to be a shortage of Medical Technologists. The tremendous volume of work during this time has been performed only because of the great devotion to duty and frequent personal sacrifices on the part of the Technologists and other members of the Staff and Personnel.

It is urgently requested that serious consideration be given to air-conditioning the entire Department of Pathology. The personnel in many laboratories work under all but intolerable conditions. It is my firm belief that this would increase efficiency and do much for morale.

The Staff and I wish to express our deep appreciation for your help and understanding of our problems. We also appreciate the cooperation of all the other individuals and departments with whom we have had contacts and dealings.

With kindest personal regards.

Sincerely,

/s/ EMMA S. MOSS, M.D.

ANNUAL REPORT

HEART STATION

July 1, 1958—June 30, 1959

The accompanying report shows the work performed in the Heart Station from July 1, 1958 through June 30, 1959. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardiograms, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

I. Electrocardiograms

ANNUAL REPORT

BRAIN WAVE STATION

July 1, 1958—June 30, 1959

The following is the annual report of the Department of Electroencephalography for the year 1959.

July 1958	88	January 1959	100
August 1958	119	February 1959	118
September 1958	90	March 1959	109
October 1958	127	April 1959	113
November 1958	86	May 1959	107
December 1958	75	June 1959	120
TOTAL EEG RECORDINGS			1,252
FETAL HEART RECORDINGS			37

Due to the shortage of instruments and personnel the laboratory is unable to handle the requests of the clinics. The present policy is to hold the ward requests down to a point that the laboratory is only two weeks behind. It would be possible, however, to accept ward appointments for as much as one month in advance. It is hoped that adequate instruments, technicians, and housing facilities might be provided in the near future so that this department will be able to take care of ward and clinic requests irrespective of number.

Respectfully submitted,

/s/ H. THARP POSEY, M.D.

H. Tharp Posey, M.D.

ANNUAL REPORT
DEPARTMENT OF ANESTHESIOLOGY
AND BLOOD BANK

July 1, 1958—June 30, 1959

The Anesthesia Department administered or oversaw anesthesia for 24,000 surgical and obstetrical procedures.

Forty-three student nurses were graduated from the School of Anesthesia and seven residents completed their training.

Dr. Margaret Kerr, first assistant resigned. She has been replaced by Dr. Carl Pope who was a full-time fellow in the department subsidized by the Louisiana Heart Association. Dr. Pope's position was taken by Dr. Frank Summers. Dr. William Trotti resigned January 1st to take a position at the Los Angeles County Hospital as a teaching staff member. Dr. James Johnson joined the staff as an assistant. The Board of Administrators approved a third full-time position effective July 1st. A suitable candidate to fill this position is being sought.

The supervisory staff of the Anesthesia School has been stable throughout the year, there having been no turnover in personnel. All employed members of the department who were eligible received a raise at some time during the year.

The employed personnel resent the spread of their forty hours over a six day work period. They feel they are entitled to the same privileges as other employees of the hospital and other state hospitals. This is understandable since other departments in the hospital not providing emergency service are closed Saturday and Sunday. It is strongly urged that operating room activities be confined to emergency procedures only on Saturday to keep up with the times.

The Department acquired several new pieces of equipment. Among these was a combination cardioscope and electroencephalogram, a Monaghan positive pressure breather, several electrical thermometers for hypothermia and various smaller items. Through the generosity of the Louisiana Heart Association an Electronics in Medicine Unit was obtained for extracorporeal heart surgery which permits simultaneous monitoring with the electrocardiograph, the electroencephalograph and arterial and venous pressures with transducers. This apparatus is assigned to Room 5 for the exclusive use of the cardiovascular surgeons.

The equipment in the Anesthesia Department is in excellent condition, being serviced continuously by Mr. G. Morgavi, a full time mechanic. Six outdated McKesson Nargraff anesthetic gas machines were exchanged for six modern up-to-date units. Three of these are of Foregger type, two of the Heidbrink and one Chicago Safety. The older model filters on all the Foregger equipment were replaced with the latest design.

The Gas Therapy Department was assigned an additional technician to permit a reduction in the working week from 48 to 40 hours and from 6 days to 5. Two dozen worn out oxygen therapy regulators were turned in and replaced by new ones.

Fourteen scientific papers and one textbook were published. Members of the staff participated in programs at various national and local meetings.

The Blood Bank had the usual activity. Blood was collected from 23,000 donors. 20,815 units were released for transfusions. The use of the extracorporeal apparatus in the operating room has imposed additional

duties on the Donor Station, since this blood required for the pump must be drawn fresh in the early hours of the morning.

It has been impossible to fill the vacancies on the technician staff of the Blood Bank for registered technologists. This is due to shortage and the fact that the laboratory operates full force six days a week. Considerable difficulty was being experienced in employing high calibre medical students as externs to match blood during the night and week-end shifts. This difficulty stemmed from the fact that the externs in the Blood Bank were receiving the poorest remuneration of all the externs in the hospital. This difficulty, however, has been overcome since the implementation of the remuneration of room, board and laundry with a \$50.00 monthly stipend.

The lack of an intensive therapy unit in the hospital imposes an unbearable strain upon the Recovery Room. Patients undergoing cardiac surgery not only crowd the unit but also impose demands upon the nursing staff which results in inadequate care and, at times, neglect of other surgical patients. The Recovery Room is at times used for an intensive therapy room for which it is wholly inadequate. This situation needs prompt correction.

Sincerely yours,

/s/ ADRIANI

John Adriani, M.D., Director
Department of Anesthesia

JA:mg

ANNUAL REPORT

LUNG STATION

July 1, 1958—June 30, 1959

Distribution of services rendered by the Lung Station during the fiscal year 1958-59 was essentially the same as for the previous year. Some services had to be curtailed rather sharply during four months of the year when we were without a second technician.

Routine ventilatory studies were performed on 397 occasions, and evaluation of emphysema on 479.

Respiratory studies were performed on 87 occasions of which 21 involved complete analysis of arterial gas tensions before and after exercise.

Evaluation of breathing mechanics and distribution of ventilatory function were studied in 137 individuals, only one of which required bronchspirometry.

Special diagnostic studies are available in the Lung Station for selected patients. These involved drill biopsy of 34 patients, diagnostic bronchial lavage on 6, and thoracentesis for 5.

It has become necessary to further limit our out-patient inhalational therapy. This is relatively time and space consuming, and is almost impossible to carry out when only one technician is available. This was done on 957 occasions, which represents a significant reduction from the previous year. This does not reflect a decrease in demand for such services, but only our inability to meet the demand. It continues to be obvious that an active department of inhalational therapy is needed.

Respectfully submitted,

/s/ JOHN H. SEABURY

John H. Seabury, M.D.

Director, Lung Station

Charity Hospital of Louisiana at New Orleans

JHS:nr

ANNUAL REPORT

ALCOHOLIC REHABILITATION UNIT

July 1, 1958—June 30, 1959

The unit consists of a ten-bed white male ward on ward W 1102 and an out-patient clinic held at 9:00 a. m. Tuesday mornings in the White Medicine Clinic.

During the fiscal year, our record of admissions, kept on the ward in a special journal, reveals that there have been 201 admissions to the in-patient unit. 70 of these represent re-admissions to the unit and 131 represent new cases not previously admitted to the ward. The objectives and aims of therapy were the same as stated in previous annual reports.

We have continued to conduct clinical evaluation of new drugs in the treatment of alcoholism. Patients on the ward have been utilized by the Tulane Medical School to teach them some of their medical students the psychiatric factors in chronic alcoholism. Some of the patients have been utilized by the Louisiana State University Medical School Neurologists to study electro-encephalographic patterns in chronic alcoholism. Physicians on the unit have been cooperating with other alcoholic agencies in the city of New Orleans, and other communities in the state in facilitating admissions of worthy patients to the ward.

During the fiscal year there have been 114 visits to the out-patient clinic, 108 white and six colored. The aims and purposes of the clinic are as described in previous reports.

Sincerely yours,

/s/ JOHN BARRY BOBEAR

John Barry Bobear, M.D.
Assistant Professor of Medicine
Director, Alcoholic Rehabilitation Center

ANNUAL REPORT

ELECTRON MICROSCOPE LABORATORY

July 1, 1958—June 30, 1959

This report covers the period since the annual progress report of Doctor J. C. Geer, dated 30 June 1958, which covered an interval when I was abroad on sabbatical leave. Shortly after my return to this country I personally submitted (8 September 1958), through our Dean's office at your request, a Research Report covering the activities of the Electron Microscope Laboratory. As far as activities and aims are concerned there has been little change in the laboratory since this most recent report, but a brief resumé is submitted below.

The electron microscope itself continues to be expertly serviced by Max R. Clevenger, who has done this on a part-time basis since the Fall of 1956. Mr. Robert E. Druce, employed by the three medically active electron microscope laboratories in this neighborhood (two at LSU Med. and one at Tulane Med.), frequently assists Mr. Clevenger on electronic and other general maintenance problems without cost to the hospital.

A number of research projects have utilized the Electron Microscope Laboratory during the past year. These have involved various levels of professional and technical personnel, including post-graduate professional investigators, graduate students, fellowship students, and technicians. At the present time the laboratory is under intensive use by a group of seven individuals being trained in the techniques of biological electron microscopy through Doctor Low's laboratory in the Department of Anatomy in LSU School of Medicine.

Two major factors (1) aging equipment and (2) growing interest in clinical applications of electron microscopy, make it imperative to plan ahead for the changes that are inevitable within the next few years. Since these are anticipated to be quite extensive as to equipment, location, and general reorganization the recommendations regarding them will be submitted in the form of a letter for your separate consideration.

In closing, permit me to express my deep appreciation for the continued cooperative spirit of the hospital authorities whose help has been invaluable to the research-minded scientists interested in electron microscopy in this area.

Very truly yours,

/s/ FRANK N. LOW

Frank N. Low
Professor of Anatomy

ANNUAL REPORT

COLLABORATIVE CHILD DEVELOPMENT PROGRAM

July 1, 1958—June 30, 1959

During this fiscal year, considerable progress was made in the development of staff and facilities for the Collaborative Program responsibilities. At the beginning of this fiscal year, many key positions on the professional staff were filled, including three part-time obstetricians, four psychologists, three pediatricians, and a part-time neurologist. Pretesting of the available forms and methodologies of the Collaborative Program was begun and a staff of trained sociologists and interviewers was employed to allow for complete processing of patients according to the protocol. The training and orientation of staff and testing of the materials and methods was conducted in various on-going clinics and departments of Charity Hospital through the very kind cooperation of the responsible section heads in the out-patient department, obstetrical department and nursery divisions of Charity Hospital. Until May of 1959, most of our full time and part-time staff was housed in temporary borrowed quarters in the Premature Infant Center on the ninth floor of Charity Hospital. By May of 1959 we began moving into the custom remodeled facility for our staff on the sixth floor of Charity Hospital and began development of our definitive program. Utilization of the Tulane obstetrical clinics by our staff had provided us with a most welcomed facility until our sixth floor unit became available. Increases in our staff occurred in June, 1959, notably in obstetrics and we soon expect to achieve our full caseload, approximating 10% of the available sample of obstetrical patients; Negro and residents of Orleans Parish.

Our tabulations of perinatal experiences at Charity Hospital for this fiscal year include several noteworthy points. The total number of deliveries fell from 13,315 to 12,321; the major reduction being of course among the Negro population, amounting to approximately 900 fewer deliveries. For the white population served there was approximately 125 fewer deliveries this year. The overall perinatal mortality rate rose from 5.2% to 5.6% during this fiscal year. While the incidence of prematurity rose about 1 percentage point for both white and colored to a level of 14.5% among the Negro patients and 9.4% among the white patients during this fiscal year. Table II of this report illustrates an approximation of the total obstetric and nursery caseload in terms of patient days of care provided in terms of the two specific weight groups of babies cared for in the tenth floor nursery; namely the term babies, 5 pounds 9 ounces and over, and the large group of premature infants from 4 pounds 11 ounces through 5 pounds 8 ounces.

Respectfully submitted,

/s/ WILLIAM T. NEWSOM, M.D.

ANNUAL REPORT

PREMATURE INFANT CARE CENTER

July 1, 1958—June 30, 1959

All facets of the Premature Infant Care Program continue to function according to established policies and plans without interruption during this fiscal year. Specific details of our service activities are reflected in the accompanying tables.

Educational activities in the Premature Infant Care Program have continued as in previous years. The medical staff of our two medical schools continues to offer training and experience for medical students, interns and residents in this hospital in all aspects of premature infant care. The post-graduate nursing course in the care of premature infants was offered this year when a sufficient number of qualified nurses had made their interests known. This fiscal year constitutes the last year of our supplementary support from the Childrens' Bureau of DHEW through the Louisiana State Health Department for support of our educational programs. The premature infant facilities of Charity Hospital have shown considerable growth and development during the past two years during which time such support has been available, and we are all most grateful for their interest in our program.

Medical student projects on problems related to the premature infant which were completed this year included a study of finding temperature patterns in premature infants, a study of pathological classification patterns from autopsy material of premature infants, and a study of the epidemiology of diarrhea in our nursery. A preliminary report on growth patterns in Negro premature infants was published by members of our medical staff, Drs. Cherry, Newsom and Bancroft of Pediatrics, July 1959. Members of the medical staff of the Collaborative Child Development Program have utilized some of the collected material in our premature infant nursery; these projects include a study of developing behavior patterns by Dr. W. Weidorn Psychiatrist, and a study of the clinical features and incidence of findings related to otitis media in the premature infant by Dr. M. McLellan.

DESCRIPTION OF TABLES

- Table I: Annual comparison of caseload by source and outcome. These tabulations show the usual numbers of premature infants admitted to our nursery by 250 gram weight groups and reflects an increase to 30.9 percent of all our infants cared for as being admitted from other hospitals.
- Table IA: Tabulation of the total hospital patient days of care provided for in the nursery. Tabulations for this fiscal year reflect an increase to approximately 36 percent of all hospital patient days of care being devoted to outborn infants.
- Table II: "Diarrheal Syndrome", Attack Rate and Mortality Rate. During this fiscal year we encountered a rise in attack rate and mortality rate among infants having this "diarrheal syndrome".
- Table III: Relationship of "Diarrheal Syndrome" to duration of hospital stay. During this fiscal year there is again reflected the relationship between increased number of hospital days occurring in infants also having the "diarrheal syndrome". Further study of this problem is continually in progress.

Table IV: Caseload and survival rate for inborn infants, showing the usual tabulations reflecting differences by weight group and race.

Table V: Caseload and Survival Rate for outborn infants. A similar pattern to that demonstrated in Table IV, indicating the usual lower mortality rate among outborn infants than among our inborn infants, presumably related to loss of weaker infants prior to their admission.

Table VI: Comparative Survival Rates for the last three fiscal years, reflects no essential differences.

The staff of the Premature Infant Care Program would like to acknowledge and express sincere appreciation to the Biometric Section of the Collaborative Child Development Program for their assistance in the tabulations and data collection carried on by the Premature Infant Care Program. The interested reader is referred to their Annual Report for further information regarding newborn infants and allied perinatal problems in Charity Hospital.

Respectfully submitted,

/s/ WILLIAM T. NEWSOM, M.D.

William T. Newsom, M.D.

Medical Director

Premature Infant Care Program

DESCRIPTION OF TABLES

The tables are arranged in order of increasing complexity. Table I shows the total number of premature infants born in Charity Hospital during the fiscal year 1958-1959. Table II shows the total number of premature infants born in Charity Hospital during the fiscal year 1957-1958. Table III shows the total number of premature infants born in Charity Hospital during the fiscal year 1956-1957. Table IV shows the caseload and survival rate for inborn infants, showing the usual tabulations reflecting differences by weight group and race. Table V shows the caseload and survival rate for outborn infants. A similar pattern to that demonstrated in Table IV, indicating the usual lower mortality rate among outborn infants than among our inborn infants, presumably related to loss of weaker infants prior to their admission. Table VI shows comparative survival rates for the last three fiscal years, reflecting no essential differences.

ANNUAL REPORT
THE TUMOR REGISTRY
July 1, 1958—June 30, 1959

ADMINISTRATIVE

The governing board of the Registry presently consists of the following members representing the institutions listed below:

Charity Hospital

Dr. Leo J. Kerne
 Dr. Manuel Garcia

Louisiana State University School of Medicine

Dr. W. W. Frye
 Dr. Rudolph J. Muelling

Tulane University School of Medicine

Dr. Edward T. Kremenz, Chairman of the Board
 Dr. Robert C. Smith

American Cancer Society, Louisiana Division

Dr. James D. Rives
 Mrs. Marian Simmons, Consultant

Louisiana State Board of Health

Dr. John M. Bruce

Louisiana State Medical Society

Dr. Ambrose H. Storck

Registry Staff

The operation of the Registry is carried out by the staff under the direction of an administrative director who is responsible to the governing board. The Registry staff consists of nine employees occupying the following positions: Mrs. Marion Wogan, Director; Mrs. Agnes Lamothe, Assistant Director; Mrs. Helen Soroce, Analytic Assistant; Mrs. Marie Louise Nolan, Abstract and Follow-up Investigator; Mrs. Marjorie Krennerich, Mrs. Sadie Mayeux, Mrs. Betsy Green, Mrs. Frances Johnson, Abstract and Follow-up; and Mrs. Loretta Soles, Clerical and other detail.

FINANCIAL SUPPORT

Support is derived from Charity Hospital, the American Cancer Society, Louisiana Division, Inc., the State Board of Health, and the C.C.N.S.C. of the National Cancer Institute.

ACTIVITIES AND ACCOMPLISHMENTS

New Location

In November, 1958 through the efforts initiated by the director of the hospital and the administrative assistant, and with the approval of the hospital board, permission was obtained to move the Registry from the first floor of Charity Hospital to W-611 on the sixth floor. This location has provided the necessary space to operate the Registry in an efficient and satisfactory manner. Room is now present for more adequate use of the Registry by the medical staff.

In June 1959 approval was granted for the air-conditioning of the new quarters to be financed through the Tumor Registry general fund. This equipment has been installed and has been accepted by the hospital as of 7/30/59.

Activities

During the last week in December, invitations to an "Open House" were sent to the various hospital departments, visiting staff, board members of the hospital, board members of the Registry and other interested persons, to acquaint these groups with the new location and facilities of the Tumor Registry.

Tumor Registry Board Meeting

The annual meeting of the governing board took place on May 17, 1959. At this meeting an annual report was read and approved; the budget for 1959-60 was presented and accepted; and current statistical data was reviewed. Plans for the next year were discussed and approved.

Cooperative Program with the National Cancer Institute

A fourth contract for partial support for the coming fiscal year ending June 30, 1960 has been signed between the Registry and the Cancer Chemotherapy National Service Center, National Cancer Institute, Bethesda, Maryland. The Registry agrees to provide a duplicate deck of its punched cards at the end of the year in return for this support.

The annual meeting of the End Results Group of the Clinical Studies Panel, C.C.N.S.C. was held May 15, 1959 at the National Institutes of Health in Bethesda, Maryland. Attending this meeting were Dr. R. J. Muelling, Dr. E. T. Krementz and the director of the Registry. Representatives from the following participating registries were in attendance:

Hospital Registries

Albert Einstein Medical Center, Philadelphia
Charity Hospital of Louisiana, New Orleans
Flower-Fifth Avenue Hospitals, New York City
Indiana University Medical Center, Indianapolis
Roswell Park Memorial Institute, Buffalo
State University of Iowa Hospital, Iowa City
University of California Medical Center, San Francisco
University of Chicago Clinics, Chicago
University of Michigan Hospital, Ann Arbor
University of Virginia Hospital, Charlottesville

State or Central Registries

California Tumor Registry, Berkeley
Connecticut Cancer Case Registry, Hartford
Massachusetts Cancer Registry, Boston
Texas Tumor Registry, Houston
Veterans Administration, Washington

International

In addition to the above identified registries actively participating, a move has been started for possible inclusion of the fol-

lowing countries for an international cooperative compilation of end results in cancer therapy:

England and Wales

Finland

France

Norway

Denmark

U.S.A.

Dr. Edward T. Kremenz, Chairman of the Tumor Registry Board, Charity Hospital, was elected Chairman of the End Results Group of the Clinical Studies Panel, C.C.N.S.C., National Cancer Institute. In this capacity, Dr. Kremenz is scheduled to meet with the International Group in Copenhagen during October 1959.

Dr. Rudolph J. Muelling was named Chairman of the Committee for Study of Uterine Cancer.

Meetings Attended

October 1958. Workshop on Tumor Registries, Indiana University Medical Center, Indianapolis. Attended by the Registry director and assistant Registry director.

February 1959. Workshop on Tumor Registries, M. D. Anderson Hospital, Houston, regional meeting American College of Surgeons. Attended by Dr. E. T. Kremenz, Dr. Ambrose Storck, the Registry director and the assistant Registry director.

Revisions of Abstract Form, Punch Cards, Code System

In accepting the Uniform Punch code developed by the Cancer Chemotherapy National Service Center and the participating registries, it became necessary to revise our own abstract form and code system. A questionnaire with copies of the old Registry code and the Uniform Punch code was sent to members of the Tumor Registry Board and the chiefs of services in the hospital. The aid of statisticians from the American Cancer Society's Statistical Research Section of the Medical and Scientific Department, as well as a statistician from the National Cancer Institute was obtained. As a result of this cooperative effort, new forms and a revised code have been developed and put into use. The new code covers all of the items of the Uniform Punch as well as additional information desired locally.

Miscellaneous

In June 1959 information concerning the location, purpose of the Registry and services available was included in the material given to the new internes and residents of the hospital.

The daily log book records 156 visitors to the Registry. This does not include written reports, statistical data, etc. requested through telephone calls or correspondence. Information on malignancies most frequently asked for has been on pelvic tumors, lung, head and neck, thyroid, melanoma, breast and prostate.

A graduate student from the Biostatistics Department at Tulane Medical School was assigned to the Registry to study and observe procedures of the Registry as a part of his special training program.

Statistical Data

In addition to supplying the doctors with information for special research studies, teaching and demonstration, the Registry provides sta-

tistics to indicate the size and nature of the cancer problem at this hospital for given periods of time. The following summary is taken from various tables of statistics prepared in the Registry:

SUMMARY 10 YEAR PERIOD 1948-1957

A. CANCER CASES BY RACE AND SEX

Distribution by:

Sex:		Race:	
Total Male	8,787	White	8,532
Total Female	7,936	Colored	8,191
1948-1957	16,723	1948-1957	16,723

Largest number of cases by anatomical site (race-sex):

	Total	Colored	White	Male	Female
Skin (not including melanoma)	2,318	2,151	167	1,459	859
Cervix	2,213	710	1,503	2,213
Lung	1,442	851	591	1,298	144
Breast	1,296	480	816	17	1,279
Prostate	1,217	442	775	1,217
Stomach	1,006	296	710	750	256

The above six sites represent over 50% of the total cancer cases.

B. HOSPITAL ADMISSIONS BY RACE AND SEX

(Compiled from the Medical Record Library Annual Reports)

Race:		Sex:	
White	209,825	Total Male	264,151
Colored	465,567	Total Female	411,241
Total	675,392	Total	675,392

C. OUT-PATIENT CLINIC VISITS BY RACE

(Compiled from the Out-Patient Department annual reports. Not available by sex except for new patients)

White	1,597,649
Colored	3,465,723
Total	5,063,412

SUMMARY 11 YEAR PERIOD 1948-1958

The cancer cases represent the parish residence at diagnosis this hospital and do not reflect approximately 400 or more cases traced out of state at follow-up.

The following information is available from the following Registry Record Systems:

- (1) Alphabetical index file for cancer patients
- (2) Medical abstract histories complete with follow-up reports for the lifetime of the patient
- (3) Pertinent data available on punch cards
- (4) Reprints from articles, etc., where information from the Registry has been used

Sample forms, operational procedures, etc., have been sent to numerous hospitals interested in setting up or revising registries of their own. Information has been sent to several out-of-state institutions—namely, The University of Oregon, Department of Oral Pathology; The University of Oklahoma Medical Center and the University of Utah College of Medicine.

Respectfully submitted,

/s/ MARION WOGAN

(Mrs.) Marion Wogan, Director
Tumor Registry

ANNUAL REPORT INTAKE DEPARTMENT

July 1, 1958—June 30, 1959

The Screening Unit for determining the eligibility of persons seeking medical care at Charity Hospital, was organized in August 1958. The Staff consisted of the Director, two Supervisors and one clerical worker and twenty-two interviewers, however, at present there are five supervisors, twenty-nine interviewers and three clerical workers.

Determining eligibility of the many patients applying to Charity Hospital for free care is the chief purpose of the department. This is done through verification of employment, salaries, debts, residency and the degree of indigency of the patients. Every effort is made to complete investigations as soon as possible in order to cause a minimum amount of inconvenience to patients.

Workers are trained to see that emergencies and more acutely ill patients are seen immediately; to maintain discipline among the patients waiting to be interviewed; to adequately interpret the Intake Policies to patients and their families; especially those found ineligible for free care and to assist this group in securing treatment elsewhere.

The unit has referred for billing many eligible patients that were found to have hospitalization insurance, also the ineligible patients who had to be admitted for emergency care or for other reasons, such as lack of beds in private hospitals. Many non-residents seeking admission have been referred elsewhere.

The workers have done a fine job of interpreting the policies and purpose of the Screening Unit to the many business organizations, private employers, agencies and other interested individuals of the community. We have received remarkable cooperation from them and their acceptance and understanding of our program has been most encouraging.

In checking the records we found that from July 1957 to July 1958 there were 524,859 patients seen in the white and colored admitting and emergency rooms compared to 338,549 patients from July 1958 to July 1959. This is a decrease of 186,310 patients during the first year of the screening program.

The patient visits to clinics from July 1957 to July 1958 was 510,846 compared to 467,065 from July 1958 to July 1959. This is a reduction of 43,781 in total patient clinic visits during our first year of screening.

With this marked decrease in the patient load throughout the hospital, the doctors have been able to render much better service to their patients, and have many times expressed their appreciation of the work being done by the Screening Unit.

With the continued cooperation of the doctors and the other departments in the hospital, all those interested in our program and the combined efforts on our part, I feel the Unit should render even greater service in the future.

Respectfully yours,

/s/ HOWARD J. HEBERT

Howard J. Hebert, Director
Intake Department

ANNUAL REPORT OF IN-TAKE DEPARTMENT

ANNUAL REPORT

SOCIAL SERVICE DEPARTMENT

July 1, 1958—June 30, 1959

The work of this Department consists principally in helping hospital patients to find ways of meeting social problems which are caused by illness, or which have an adverse effect upon their response to treatment. Such a problem might, for instance, include a degree of physical or mental incapacity which would prevent the head of the household from earning enough to provide for the needs of his family, or to meet the special expenses occasioned by the illness. In less obvious, but nevertheless equally serious situations, the need of the patient might revolve around a lack of understanding and acceptance by the patient and his family of the limitations imposed by the illness and its treatment with a consequent blocking of the treatment process. Interrelated with the direct help given to patients and their families is the responsibility of the department to facilitate, in such ways as are appropriate, the operation of hospital services: for example, coordination with social agencies outside of the hospital on an administrative level and in individual cases. Within the hospital this responsibility is met through such activities as compiling social histories on new patients (mainly in the Psychiatric and Pediatrics Units) for intake purposes and as a part of the diagnostic study; helping with discharge plans for the chronically ill patient not in need of hospitalization; or planning for children left without adequate care during the hospitalization of the responsible adult.

Services to Patients

The number of patients requesting service of the Department increases steadily. During the past fiscal year the workers were able to give assistance to 42,812 patients (an increase of 2,199 over the previous year). The services given ranged from comparatively simple, short-term contacts to ones involving complex family problems, or individual problems requiring detailed study and continued contacts. A permanent record was kept on 10,638 of these patients.

Examples of some of the tangible services given are listed in the table that follows, with the number of patients receiving the service and the approximate number of contacts required to complete the service.

Service Given	Patients Served	Contacts with or in Behalf of Patients
Nursing Care in the Home.....	1177	1576
Child Placement	630	834
Placement in Nursing Home.....	1966	2513
Financial Assistance	8210	9180
Homemaker Service	108	180
Vocational Rehabilitation	1211	1480
Shelter Home Care	336	421
Appliances and Medication	17634	19201
Transportation	416	511
Hospitalization & Other Medical Procedure..	948	1101
Interpretation & Planning with Personnel regarding patient's social situation ...	5184	5998
Unmarried Mothers Served	192	307
Interpretation of patient's medical social situation to other agency	3071	3520

The social workers do not see every patient who comes to the hospital for treatment. This would not be practicable in view of the number of pa-

tients as compared to the size of the social work staff. Nor would it be desirable, since many of the patients are self sufficient and do not require outside assistance. In order to select the patients who do require the services of a social worker, referrals are encouraged from hospital staff, workers from other social agencies, and from the patients themselves or their families.

The caseload was divided as follows as to source of referral:

From Hospital Personnel	13,947
From Department of Public Welfare	3,081
From Other Community Agencies	2,611
From Patient or Patient Group	23,173
Total	<u>42,812</u>

Since the hospital treats patients from all sections of the State, the patients seen by Social Service follow the same geographical distribution:

Patients from Orleans Parish	24,618
Patients from Other Parishes	17,676
Patients from Other States	518

The small number of patients from other states is accounted for by the fact that non-residents of the State are not eligible for treatment nor for service from this Department. However, in some instances, emergency care must be given.

Use of Funds

Since Charity Hospital patients are of borderline or sub-borderline financial status, many of them are not able to meet the extra expenses associated with illness. This is particularly true in regard to medications, appliances, transportation and the like. If the need is not emergent, and is to be of long standing, referral is made to the appropriate agency in the community for help. However, in many instances there is an emergency need of this nature which cannot be met through the use of another agency, either because of the time element, or because the patient does not meet the eligibility requirements of the agency in question. This Department has small funds which can be used to supply a portion of the emergency medical needs of these patients. These funds are derived from individual donations, income from bequests, and hospital appropriations, as follows:

Name of Fund	Amount Available
Stauffer-Eastwick	\$ 4800.00
Patients Welfare	1200.00
Well Convalescent	360.00
Insulin	4800.00
American Cancer Society	1451.33
Special Donations	1600.00
TOTAL	<u>\$14,211.33</u>

The total amount of money expended was \$12,850.43. This does not represent the total amount of money available, because of restrictions on the use of the largest of the funds. Listed below is the purpose for which funds were used, the number of patients helped in this way, and the amount of money spent.

Reason For Using Funds	No. of Patients	Amount
Medication	9234	\$ 9,816.43
Transportation	354	817.00
Maintenance	41	342.00
Appliances	417	1,875.00
TOTAL	10,046	<u>\$12,850.43</u>

The problem of providing medications for out-patients has reached enormous proportions, and is one with which the Department cannot continue to cope. The amount of money available is not sufficient to meet the need, and the Department is not staffed to investigate the cases properly or to dispense the drugs even if sufficient funds were available. An index to the proportions of this problems is that of the 25,559 patients applying in person to the Social Service Department office (this does not include the patients seen by the workers in the wards and clinics), 19,091 were patients asking for medications. As may be seen above, the Department was able to fulfill this request for only 9234 of these patients.

Staff

The Department has continued to operate with a significant number of vacancies on the professional staff. One supervisory position remains vacant, and there has been an average of 12 vacancies among the medical and psychiatric social workers. There were eight resignations during the year, and 13 replacements. However, of the 13 replacements, four were graduate students who were employed for the summer only during the vacation period. On the whole, the staff situation was slightly better this past year, to the extent that it has been possible to renew services, on a limited basis, in some of the clinics which had previously not been covered.

There are two factors in the difficulty of maintaining adequate, stable professional staff. In the first place, the demand for professionally trained social workers throughout the country far exceeds the supply, with the result that the qualified worker has a wide field of selection for employment. Secondly, although there has been improvement in this area, the salary range in this department is still low in comparison to other agencies.

One clerical position has remained vacant. Otherwise, this portion of the staff has remained comparatively stable, with three resignations and two replacements.

Twelve social work students received their field work instruction in the Department. Of these four were in their first year of graduate training at the Tulane School of Social Work and were supervised by members of the Social Service Department supervisory staff. Eight students were in their second year of training of Psychiatric Social Work, six from Tulane and two from LSU. These students were supervised by faculty personnel.

Eligibility Determination

Effective the beginning of this fiscal year, Social Service was relieved of the responsibility for the determination of eligibility, and a separate department for screening patients was established. This has been a positive development from the point of view of the Department, in that it has permitted more concentration on the central function of service to patients.

General

A partial solution to one of the Department's perennial problems has been reached. Because of lack of space, it has been impossible to provide private interviewing space for the workers in the main office. This has been relieved by consolidating work space in the workers' room so that one small room is available for this purpose. Also, private cubicles for interviewing are available on the wards for the four workers on the Tumor and Pediatrics services.

Also related to the problem of space is the crowding of the file room. This is being met by reviewing and destroying case records which seem not to be of current or future value.

Serious consideration should be given to the problem of the intolerable heat during the summer months in the offices assigned to the psychiatric social workers. These workers are stationed on the third floor where discomfort is intensified by the fact that there is little circulation of air due to the fact that there are wards, offices and classrooms which must be kept closed off from the corridors.

ANNUAL REPORT MEDICAL AND PATIENTS' LIBRARY

July 1, 1958—June 30, 1959

STAFF

The library staff remained unchanged during the year. Through the volunteer program in the hospital, much help was given in the way of hours of work on the wards and many donations of books and magazines.

Reading Room Activities

The attendance in the library varies during the day and night hours but it remained high. The collection of new magazines on the shelves in the reading room has increased with the cooperation of doctors and personnel who contribute their recent copies. We have a very nice general collection with the subscriptions and donations on many subjects. In the line of medical journals, we carry the ones which are referred to the most and there are ones for every field of medicine. We now have one hundred and forty-seven medical tapes which can be used on the tape recorder. There are tapes on General practice, Internal Medicine, Ob-Gyn, Pediatrics and Surgery. We have a minimum of medical reference books as we are so close to L.S.U. and Tulane Medical Library. The books we do have are the essential ones. Our accession number has reached 8659. Many new books were given and bought through the Henderson fund during the year.

Doctors seem to relax very well in the library either with a reference or magazine or book. They were assisted every way by the staff or externs on duty at night. There was a feeling of cooperation between everyone this past year as it usually is.

Ward Rounds

Ward rounds are made daily. The patients look forward to visits with the books and enjoy the volunteers or staff talking with them. Volunteers are trained before being sent out with the book cart. The regular staff visits the wards also. Books and magazines were sent to the third floor through the recreational director and occupational therapy department. We received cooperation in our work on the wards from the sisters, chaplains, nurses and others.

Donations

All magazines and paper back books were donated that were used on the wards. We received many bound books. Professional and medical staff as well as the personnel of this hospital have contributed in some way to this library. We received donations from church groups, clubs, individuals and business firms. Some have contributed for years. We never make public appeal but at Christmas or during the year, thank you notes are sent and Christmas cards to the generous givers. The majority are from New Orleans but we have some who live in other parishes.

ANNUAL REPORT

CHARITY HOSPITAL GUILD WORK

July 1, 1958—June 30, 1959

Following are some of the activities of the members of the Charity Hospital Guild for the Hospital and the Patients.

Sixty layettes were made and given as needed, also large amounts of used clothing, new and used shoes, books, magazines, games and toys.

At Christmas, several hundred dolls and toys were given to the children on the ninth floor, some also to the children in the contagious, polio, and tubercular wards. This party was given by Mrs. Walter Grunning, Chairlady of the Doll and Toy Committee.

At Christmas, also at Easter, a party was given to the Tubercular children by the colored willing workers of the Guild.

Special attention is given to the John Dibert male patients by the Magnolia Branch of the Louisiana Sunshine Society of which Mrs. Joseph Snakenberg is President. This Society gives two parties a year for the patients; one at Christmas at which time each patient receives two T shirts, two pairs of socks, ice cream, cakes, and other gifts. The other party is given at Easter, when they receive Easter eggs, fruit, ice cream, and cakes.

The Magnolias give four pounds of coffee weekly to the male patients of Dibert. They also gave to the orthopedic patients of the seventh floor, one box of oranges, one box of apples, and four dozen dyed eggs. Gifts and refreshments were greatly appreciated and enjoyed by all.

This same Society gives one layette for the first white baby born on Christmas day. All these ladies come weekly to help in making surgical dressings in the Guild as well as baby garments.

Four parties were given by the Guild members to the Golden Age ladies who come weekly to make surgical dressings.

Guild Counselor	Sister Margaret
Honorary President	Mrs. C. Warren Gilmer
Secretary	Mrs. Arthur Bernard Brown

CHAIRMEN IN CHARGE OF MEETINGS

Monday	Mrs. George Chehardy Mrs. Arthur Esler
Tuesday	Mrs. Joseph N. Dazet Mrs. Joseph Snakenberg
Wednesday	Mrs. Joseph N. Dazet Mrs. John D. Nix
Thursday	Mrs. Leopold P. La Poutge Mrs. Samuel L. Ebeling

ANNUAL REPORT
POLIOMYELITIS CENTER
July 1, 1958—June 30, 1959

The Polio Center, located in the Lapeyre Miltenberger Home for Convalescents, occupies second floor. Isolation, convalescent, and iron lung patients are all housed in this area.

This year a total of thirty-nine patients were admitted with a daily peak census of sixteen in October 1958. Of the total admissions, twenty-nine were diagnosed and treated for poliomyelitis. Ten were non-polio. There were seven respirator cases and five deaths, two of which were polio and three non-polio.

Early in the summer of 1959 there was an influx of polio patients, and it was felt necessary to recruit one nurse through Red Cross to supplement nursing staff. This was done, and nursing care load was eased considerably.

During the year, W & C TB Pediatric patients were moved from fourth floor to third floor of this building, and the cage storage area in the basement was converted into a record room facility for the entire hospital.

In 1958 the low census and minimal admission rate seemed to indicate that the Salk vaccine might have eliminated polio as an epidemic disease, but the influx of patients in 1959 made it apparent that there was still much work to be done before we could discount the threats of this disease.
